## autobiography francisco varela

love presence death

this web of voices offers a mobile, richly layered image of francisco varela – as a human being, son, brother, father, friend, lover, colleague, teacher, prime mover... and as a dying man. as very few before him have done, francisco varela attained levels of accomplishment in western science as well as in buddhist philosophy and meditation, which provided the guiding principles that accompanied him until the very end of his all too brief life.
