

SCIENTIFIC STUDIES ABOUT TIBETAN MEDICINE

Almost 100 scientific studies about Tibetan medicine have been published until today.

You can find information about these studies in the internet under **PubMed** www.pubmed.gov which is the U.S. National Library of Medicine's database of indexed journal citations and abstracts since 1966 covering nearly 4,500 journals. New citations are added weekly. Links to the full texts of the studies are in some cases available.

How to proceed

Enter one or more search terms into the search field e.g. **tibetan medicine**, then press „go“.

You get a list of scientific publications about Tibetan medicine with the references, mostly abstracts and sometimes links to the full text of these studies.
